Objective

To seek opportunities to develop and expand my technical knowledge and expertise in JavaScript. An ideal position would be in an environment where I can use my creative engineering skills to solve complex problems, in a culture that values collaboration, diversity, and community-involvement.

Experience

- Led dev efforts for projects to deliver features and manage dependencies
- Implemented responsive design for cross browser and device accessibility
- Collaborated with designers, QA engineers, and project managers to clarify requirements and build optimal solutions
- Effectively worked in agile methodologies to coordinate development efforts and communicate with stakeholders

Skills

- React, React Native
 - Redux, MobX
 - Node.js
 - CSS, SASS
 - Firebase
 - Jest
-

Work History

Mutual Mobile - Austin, TX

June 2017 - Current

Technical Lead I

- Built and maintained multiple React Native apps for clients such as JrNBA and Birds Barbershop and React web apps for Southwire and BioLab
 - Supported project management by estimating timelines for feature implementation and assigning tasks accordingly
 - Provided production support to accommodate clients' needs and improve product usability
-

Personal Project

Greenbelt Now greenbeltnow.com

- Responsive React app displaying data from USGS API using React Hooks for state management
 - Referenced by the Statesmen, KVUE, and Austin Monthly
-

Volunteering

Girls Who Code

2017 - 2018

- Led lessons on computer science concepts for 4th - 8th grade students and helped them build tools that impact their community

Country Girls Can Code, ChickTech, Coding4TX

2017 - 2018

- Provided instruction and support at various events for high school students to help them explore computer programming and careers in this field
-

Education

UT Coding Bootcamp, Certificate in Full-Stack Web Development

2017

University of Texas at Austin, Bachelor of Science Biology

2014
